

EUROSEC

AUTOMATION & SECURITY

ABOUT EUROSEC

Eurosec Automation and Security Systems L.L.C. is a privately-owned company based in Dubai with over 10 years of experience. Eurosec is a full-service security systems and ICT technology integration company for both commercial and residential.

Originally addressing the technical needs of the security, access control and ICT market segments, today we are focused on providing solutions that have been engineered not just for performance and features, but for future generations.

As the market needs continued to grow and evolve, so did Eurosec's service offerings. Over the years, the company made a series of strategic investments and acquisitions that not only expanded their portfolio of expertise but also extended their geographic footprint to better serve a growing client base. Eurosec operates today from the UAE since 2007 and the UK, since 2017.

Drawing on our extensive experience, Eurosec has dedicated itself to diversification, adapting and growing in line with emerging technologies. Hence, we have recently launched our new division for the supply and installation of Electric Vehicle (EV) charging stations. Our product offering continues to grow as technology continues to provide new and more advanced products for homes and businesses.

Our advantage of being able to design, install and service a completely integrated system is significant. Builders, homeowners and business owners are afforded the time saving ease of dealing with only one company.

Our aim, with our extensive product offerings, professional service and quality installations is to become a reliable partner and a "one stop shop" technology provider for businesses and homes.

We have what it takes to make your home, your new project or your business a safer, better protected, more enjoyable and more efficient environment for you to live or work in!
